

# RENT

# REDUCE & REUSE

# RECYCLE

Reduce your event's footprint on the Earth.  
Go green with Arizona Party Rental.

By the very nature of our business, we are considered eco-friendly because **we reuse the same items over and over.** We offer many specialty and eco-friendly products and will continue to search for high-quality, sustainable rental products to help protect our environment.

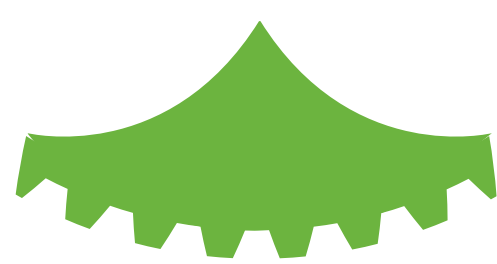

Our linens are **washed with eco-friendly detergents**, and only full loads are run. A highly efficient Rinnai Water System reduces energy consumption while our Hanger Reuse Program recycles and reuses hangers.

Renting and reusing wine glasses, dishes and silverware is the green way to go. They're always wrapped in recycled plastic, and washed and sanitized with eco-friendly detergents. **Events that avoid throw-away items like Styrofoam and plastic make a big difference.**

**We offer silk flower and succulent plant options.** They reduce pesticides and harmful chemicals used with traditional cut-flower arrangements.

Arizona Party Rental's new LED (Light Emitting Diode) lights are extremely efficient, **requiring significantly less energy than traditional lighting.**

We only use **re-usable flooring products** such as Bil-Jax, instead of plywood sub-floors with chemical and biocide content.

Arizona Party Rental also offers green For Sale products.

**We recently introduced the beautiful, functional and compostable Bambu line** of plates and utensils. Made from biodegradable material and 100% organically-grown Bamboo grass. The product uses no bleaches or dyes-and can also be reused!

Look for new product introductions including cornstarch utensils, compostable cups and eco-friendly hot cups as well as biodegradable trash can liner options.
